Helium Tanks should be shut off and capped when not in use. Tanks must be secured against a wall with a safety strap. It's A Gas cannot be responsible for any damage caused by the tanks while in the renter's use. The haz-mat number for helium is UN1046. It is a compressed gas and can cause lung damage. Helium should never be inhaled. By renting or purchasing a tank from It's A Gas, you show that you understand these terms.
